

PRODUCT QUANTITY ESTIMATOR

To use: **1.** Locate wall length to determine number of Torpedo™ base blocks needed. **2.** Combine wall length and exposed wall height to determine number of wall blocks needed. The Belair® freestanding wall system can be used to build walls up to 3 feet including base course, but excluding the cap.* Installation instructions and estimating are based on using sets. **3.** Add double-sided cap block quantities.

*The Torpedo™ base block is available in select markets, and can be used for retaining walls featuring the Anchor rear-lip design up to the retaining wall system's gravity wall height.

** This height assumes level backfill and clean, compacted sand or gravel and no surcharge. Taller walls can be built with the system blocks as the buried base course and geosynthetic reinforcement, or with the Anchorplex™ retaining wall system, when designed by a qualified engineer.
