Anchor Wall Systems Introduces the LedgeWall™ Retaining Wall System

MINNEAPOLIS (March 31, 2010)—Continuing to bring premium-quality retaining wall products to the retail market, Anchor Wall Systems announces the launch of the LedgeWall™ retaining wall system. Featuring a decorative face style with the appearance of stacked stone, the LedgeWall product is produced with patented Anchor™ Sculpisit™ block-molding technology.

Available at select Lowe's stores and designed for the do-it-yourselfer, the LedgeWall product combines aesthetic beauty with superior performance. The product's Anchor-invented rear-lip locator makes installation fast and easy, while the stacked-stone face style gives walls a rich appearance.

"This is a perfect product for homeowners who want their landscapes to stand out from the rest of the neighborhood," says Wendy Goodman, Anchor Wall Systems product manager. "The LedgeWall system has a distinctive appearance that complements trees, shrubs, flowers and man-made outdoor elements."

The system is made up of five separate 4 x 12-inch blocks, each with a different face pattern, and a set of five matching caps. Combined in a wall, the effect is one of random stone.

For more information about the LedgeWall retaining wall system please visit www.anchorwall.com

Anchor Wall Systems develops attractive, durable and easy-to-install retaining and freestanding wall systems. The company licenses its designs, which are backed by extensive testing and research, to more than 50 manufacturers in 21 countries who then market to contractors and homeowners through landscape supply dealers and big-box retailers. The end result is anything that can be imagined: innovative, lasting landscapes and environmentally sound walls that let consumers and contractors design—and build—something beautiful.
