

PRODUCT INFORMATION

Bayfield[®] multiheight retaining wall system

With a distressed face style adaptable to many landscapes, the Bayfield[®] multiheight wall system is available in textures and colors inspired by nature.

The rear-lip block and lighter core make the system a reliable and easy-to-install alternative to natural stone walls. Use of the 6-inch-high Bayfield units alone or mixed with the 3-inch-high blocks creates stunning walls.

A complementary multiheight, freestanding wall product and accessories complete the Bayfield[®] system.

**No pins. No mortar.
No misalignments.**

Rear-lip block, invented by Anchor, makes installation fast and accurate. Anchor[™] - the original rear-lip product!

Retaining wall system

- Can be used for gravity walls up to 3 feet 6 inches high, including buried course, but excluding the cap*
- Taller walls can be built using geosynthetic reinforcement or the Anchorplex™ retaining wall system when designed by a qualified engineer
- Minimum outside radius, measured on the top course to the front of the units: 3 feet**
- Minimum inside radius, measured on the base course to the front of the units: 6 feet**

Combine the Bayfield® 6-inch and 3-inch wall systems to construct a multiheight wall with the easy-to-use Sequent™ panel installation pattern.

* This height assumes cores are filled with drainage aggregate, level backfill and clean, compacted sand or gravel and no surcharge.

**May vary depending on the installation pattern.

6" Retaining Wall Units

	Large	Medium	Small
Approximate Dimensions*	6" x 18" x 10"	6" x 12" x 10"	6" x 6" x 10"
