Corners—Outside 90° With Reinforcement

**FIRST COURSE WITH REINFORCEMENT**
Begin by checking the wall plan to determine reinforcement lengths and elevations. Lay a section of reinforcement near the corner of the wall, ensuring that it’s placed within 1 inch of the face of the block and running along the back of the adjacent wall.

**ADDITIONAL COURSES**
Lay the next course of block, backfill and compact. When installing the next section of reinforcement, place within 1 inch of the face of the block and running along the back of the adjacent wall. Alternate the reinforcement extension on each course where reinforcement is required.
